

FIND THE INFORMATION YOU NEED.

DiscoveryGate®

DiscoveryGate. Find the information you need.

Identify and organize similar chemical structures, reactions and related data.

Review ways of synthesizing compounds and browse reference information on the scope and limitations of methods.

View reported toxic effects and metabolic pathways of compounds.

Find commercial suppliers of compounds.

Explore important patent chemistry data.

Link from citations associated with any search result directly to the original article or patent.

Make better decisions in an integrated research environment.

Fast, simple, easy access to a wealth of discovery content

DiscoveryGate, from Elsevier MDL, is the only service to integrate, index and link content sources necessary for answering discovery questions.

- **Primary literature:** Link to over 20,000 journal titles and patents from 41 patent-issuing authorities worldwide.
- **Secondary data:** Access over 27 million structures, 500 million associated synthesis, bioactivity, metabolism, toxicology, physical property and sourcing facts, and 17 million reactions, including references to more than 20 years of patent information.

Interconnected content for easy exploration

Quickly access summaries of relevant data or actual database details. With a click, transfer DiscoveryGate results into desktop applications—or even an application on another Web site—to conduct more refined explorations. Or click from desktop applications to launch DiscoveryGate, and search DiscoveryGate content to support or test hypotheses.

DiscoveryGate advantages

Search in a single discovery environment. Answer essential discovery questions in one place. Easily transfer results between applications.

Easy access. Search DiscoveryGate whenever you choose, as often as you like, with your Web browser.

Powerful administrative tools. Deliver content and applications efficiently to project teams and research groups. Your organization decides who needs—and gets—what.

Full application management and maintenance services. Elsevier MDL provides the content, the tools to use it and the support to keep your organization up and running.

DiscoveryGate today

Fast. First 12 hits displayed as soon as retrieved for most databases.

Simple. Use the drop-down pick list in MDL® Database Browser to access highly respected chemical content databases, including CrossFire Beilstein, MDL® Available Chemicals Directory, MDL® Drug Data Report, MDL® Patent Chemistry Database and much more.

Easy to use. “Also found in” links connect common records in different databases, enabling you to better exploit indexed content.

Query highlighting. Substructure queries embedded in retrieved compounds are highlighted, enhancing ability to interpret results.

List handling. Create, combine and sort hit lists.

Robust exporting and reporting capabilities. Easily export RDF files and table files from all databases. Quickly consolidate information from multiple data sources in HTML format.

Flexible viewing options. Click through selected databases to see all relevant data for indexed records, optionally selecting the data to search and display.

About Elsevier MDL

Elsevier MDL provides informatics, database and workflow solutions that accelerate successful R&D by improving the speed and quality of scientists' decision making. Academic and industrial life sciences researchers around the world depend on Elsevier MDL for innovative and reliable discovery informatics software solutions augmented by 400 Elsevier chemistry and life sciences journals and related products. For more information, visit www.mdl.com.

Elsevier is a world-leading publisher of scientific, technical and medical information products and services. Working in partnership with the global science and health communities, Elsevier publishes more than 2,000 journals and 1,900 new books per year, in addition to offering a suite of innovative electronic products and online reference works. For more information, visit www.elsevier.com
